

# CB ENERGY TRANSITION PORTFOLIO (USD)

Report February 2023

## Strategy description

The CB Energy Transition Portfolio invests in long/short equity managers focused on global energy transition and aims to beat the MSCI World TR Index and the MSCI World Energy Sector Index over the medium term with significantly lower risk (volatility). By investing in specialist funds, investors gain exposure to the global energy transition theme, that predominately invests in the renewable energy and utility sectors. The combination of a diverse set of portfolio managers provide a well-diversified stream of both alpha and beta returns. The beta of the portfolio will be below 0.5 in average and a good portion of the returns will be derived from superior stock picking on the long and short side (alpha). The certificate invests in offshore and UCITS funds that are strictly regulated. It offers monthly liquidity with a notice period of 35 days.

## Monthly returns

BM1: MSCI World TR Index (USD) | BM2: MSCI World Energy Sector Index
