PRODUCT INFORMATION

Description

This Product (hereinafter, also “Certificate”, “Note” or “AMC”) is an Actively Managed Certificate. The Product allows for participation in the performance of the Underlying (the “Strategy”). The Strategy reflects a notional actively managed portfolio of assets and cash, maintained by the manager (the “Strategy-Manager”). The performance of the Strategy is tracked via the calculation of the Strategy Level.

The holders of the Product (hereinafter, “Holders of the Product”, “Holders of the Certificate” or “Note Holders”) have exposure to the same performance a real portfolio would have, if it was actually managed according to the Strategy. However, the Holders of the Product will not be entitled to real assets in a real portfolio and have only a claim against the Issuer on the payment of the Redemption Amount based on the Strategy-Level at the Final Valuation Date.

Underlying

The Underlying is a basket representing a notional actively managed portfolio (the “Reference Portfolio”) of assets (the “Constituents”) and cash in the Currency of the Product (the “Cash Position”), which together shall be referred to as the “Strategy-Components”. The basket is selected and managed by the Strategy Manager in accordance with this termsheet (“Termsheet”), the “Investment Strategy” referred to here below as well as the investment universe (the “Investment Universe”), the guidelines (the “Strategy-Guidelines”) and the investment restrictions (the “Investment Restrictions”), as per Annex 1.

Investment Strategy

The AMC aims to deliver steady, positive returns in EUR regardless of the equity market direction. To achieve this objective, the certificate invests in alternative investment funds which are market neutral, have a proven track record, use only highly liquid instruments, and are currency hedged. The equity arbitrage strategy extracts alpha from price differences of the same underlying company across different markets or similar exposures that have deviated significantly and are expected to mean revert. The net exposure of the strategy is closely around zero at all times.

Reinvestment of Returns

Any amounts reflecting net dividends and/or interest rates in a real portfolio consisting of the Strategy-Components will be added to the Cash Position of the Strategy-Level. Any withholding taxes or similar taxes that might be charged on any of the Strategy-Components by tax authorities will not be reclaimed and will not be added to the Cash Position of the Strategy-Level.

Initial Weighting of the Strategy-Level

The Strategy-Manager starts to implement the Strategy at the first possible trading day after Payment Date according to this Termsheet, the Investment Strategy, the Investment Universe, the Strategy-Guidelines and the Investment Restrictions. The

Initial Strategy Components will depend on the market conditions at the time the Strategy-Manager starts to implement the Strategy.

Strategy-Level (t)

Value of the Reference Portfolio on any trading day t , determined by the sum of the prices of each of the assets contained in the Reference Portfolio, converted to the Currency of the Product at the prevailing exchange rate(s), less all costs linked to the management of the Strategy including (but not limited to) fees, expenses, hedging and transaction costs, custody fees and taxes (if any), and divided by the sum of outstanding Certificates on such trading day t , as calculated by the Calculation Agent.

Redemption Amount

On Redemption Date, the Certificates will redeem a cash amount in the Currency of the Product equal to the Strategy-Level on the Final Valuation Date, as calculated by the Calculation Agent.

The Strategy Manager, as appointed by the Issuer, is responsible for the Strategy. No party, including the Paying Agent, is therefore liable to any party for any loss in connection with the investment, nor for the performance of the Strategy. A Noteholder's entitlement is limited at all times to the Redemption Amount at Final Valuation Date. In a worst-case scenario, the Redemption Amount may be zero. Noteholders should be aware that positive performance of the Strategy cannot be guaranteed.

Prices of the Strategy-Components

The prices of the Strategy-Components used as a basis for the calculation of the Strategy-Level are calculated at the sole discretion of the Calculation Agent, based on the values provided by the Custodian or any third party source that the Calculation Agent may deem appropriate to determine the fair value of the component.

Price of the Certificate

The price of one unit of this Product on a specific trading day t is equal to Strategy-Level(t).

Selection / Adjustments / Rebalancing of the Strategy Components

Adjustments of the Strategy-Components are actively made by the Strategy-Manager.

Termination Event

The Issuer and the Strategy Manager have the right to terminate the Product at any time ("the Termination Date") without a specific reason, by notifying the Holders of the Certificate on the earliest possible date.

Consequences of a Termination Event

Following a Termination Event, the Certificates will redeem a cash amount in the Currency of the Product equal to the Strategy-Level on the Termination Date ("the Termination Amount") as calculated by the Calculation Agent.

Investors should be aware that the Termination Amount may be, due to unfavourable market conditions, considerably lower than

the Issue Price or the last valuation of the Product before the Termination Event.

The Issuer has the right to reduce the Termination Amount considerably (including to zero) in certain situations This may include, but is not limited to illiquidity or insolvency of an underlying asset(s) distressed situations related to or impacting an underlying asset.
